Choosing accessories for your hijab

Pick your scarf before buying a brooch, comb or pearl detail. Set the piece against the fabric to see how the colour works and whether its weight pulls on the scarf.

Before you buy

Send Sinem a photo of the front and back. A comb, pin and ribbon each attach differently. Ask which accessories you'll need to provide yourself.

Test the fastening on a fabric offcut

If your scarf is finely woven and you have a spare piece of the fabric, test the fastening on that. If it catches a thread, ask about a different way to attach the accessory.
