A comb, hairpin or veil for occasion styling

A comb can sit above a low bun, while a small pin can pick out a curl or a fold in a scarf. Ask which accessories are available for your date.

Bringing a family piece?

Photograph the clasp, teeth or back of the piece as well as the front. That makes it easier to discuss how to wear it with a delicate fabric.

Give an heirloom a clear place in the hairstyle

If a family comb has a motif finished on one side, try it on both sides of your bun. Choose the position that keeps the design upright and visible from the angle you like in photos.
