Makeup at home for brides and guests

For a special occasion, you can have your makeup done at home, on its own or together with hair or hijab styling. Tell Sinem what you usually wear and what you'd like for the day.

Choose a useful reference

A daylight photo shows the colour of a lipstick or eye shadow more clearly than a filtered image. Your usual lip colour is a good starting point if it feels like you.

Choose a lip colour you can touch up

If you would like to touch up after the meal, set aside a lipstick you enjoy wearing and discuss how it fits the look. You will already have the right shade in your bag.
