Fitting your bridal veil in Rotterdam

If you are having a bridal veil fitted in Rotterdam, start by showing the comb or loop attached to the veil. To remove it for dancing after the ceremony, choose a spot the person helping you can reach. A low bun and the folds of a bridal hijab offer different places to fasten it.

Taking it off after the ceremony?

Mention this before styling begins. A veil worn only for the ceremony needs a fastening you can remove while leaving the bun or scarf in place.

Show your helper how the veil comes off

Ask the person helping after the ceremony to watch the veil being fitted. A photo showing the position and direction of the comb can help when it is time to remove it.
