Why have your hijab styled at home in Utrecht?

With a home appointment in Utrecht you can see the scarf against your own dress and jewellery in your own mirror. It also saves a trip to a salon on the morning of the event.

Keep both scarf options nearby

If you're deciding between two scarves, set them both out. In daylight you can see how each fabric looks with the dress, how it drapes and whether it leaves the neckline visible.

Check the look where the photos will be taken

If you will have portraits taken at home, look at your scarf beside the window you plan to use for photos. A pale undercap can show through differently there than at the hall mirror.
