Can I book makeup and hijab styling together?

Yes. Sinem offers both hijab styling and makeup. Say if you prefer a soft daytime look or a more defined evening look and mention the colour of your scarf.

Coordinate the details

If your scarf has a sheen or a decorated edge, take it into account when choosing your eye makeup. A picture of you wearing the scarf shows more than a photo of the fabric alone.

Keep the detail that feels like you

If a red lip or visible pearl earrings are part of every celebration for you, start there. Then decide how closely the folds frame your face and where you prefer a softer colour.
