Finding hijab styling examples that suit your outfit

Find Sinem on Instagram at @sinemturban. When looking for a style for your dress, look for examples with a similar neckline, scarf fabric or veil. Ask Sinem which folds will work with your own scarf.

What to look for in a photo

Look at the side view as well as the front. Is the scarf loose at the neck or folded close? Is the veil set high or low? This helps you point out the detail you'd like for your own look.

Adapt an inspiration photo to your own scarf

If a wide fold catches your eye in a photo, also show your own scarf draped over your hand. A soft, fine fabric may need a different fold to create the line you like.
