How do I discuss a custom bridal veil?

Start with the length you like and when you plan to wear the veil. Send a photo of your dress and an example of the veil you have in mind. Ask Sinem separately about custom work and its lead time.

Measure from where the comb will sit

Measure from the planned attachment point to the place you want the veil to end. A veil starting higher needs more tulle to reach the same point. Note whether you measured in your wedding shoes.
