Which Turkish bridal hijab styles can I use for inspiration?

For a Turkish-inspired bridal look, consider a smoothly wrapped scarf under a long veil or soft folds finished with a single decorative pin. Choose a reference that shows the sides and back as well as the front.

See how the folds finish at the back

A smooth front can finish in a long point or a compact knot at the back. Look for a rear view of the Turkish bridal style as well, especially if your dress has buttons or embroidery there.
