Which hijab styles work well for a special occasion?

A smooth, light drape works well for a daytime celebration. For a henna night or an engagement party, try a fuller fold, a contrasting texture or one piece of jewellery. Tell Sinem how much coverage feels right for you.

Choose folds for dinner and dancing

A long, loose end can look lovely in a portrait. If dinner or dancing follows, see whether you can wear it over your shoulder or have it secured as part of the style.
