What should I consider when choosing my bridal hair or hijab?

Start with the styles you enjoy wearing, the neckline of your dress and any veil or hairpiece. Consider the side view and how the style feels as you move. You will be wearing it through photographs, the ceremony and the celebration.

Try the look with and without your bouquet

When trying the look, hold your bouquet or something of a similar size. A wide veil, a full shoulder fold and a large bouquet sit close together in photos. Decide which detail you would like to stand out.
