How do I prepare my home for hijab styling?

Set a chair beside a mirror in good light, with room for someone to work around it. Put out your scarf, undercap, veil and any jewellery you plan to use. Wear something you can take off easily once your styling is finished.

Set out the fabrics in reach

Place your scarf, undercap and veil on a clean table beside the mirror and put pins in a separate dish. You can reach another accessory during the fitting without stepping over fabric.
