How do I choose a bridal stylist in Amsterdam?

To find the best bridal stylist for your Amsterdam wedding, start with two examples that match your hair length and texture or the hijab you want to wear. Compare how the veil is secured, when you can be ready and what the price includes. The same shortlist of questions works for a salon or a stylist who comes to you.

See the same style with the veil off

If a bridal style catches your eye, ask to see the same bride after she took her veil off. You can then see how the area around the comb looked for the reception.
