Which bridal hairstyles work well for a square face?

For a square face, waves that fall just past the jaw soften its outline. To bring your jawline into view, try a smooth low bun with a side part. Compare these bridal styles with the same earrings on. Notice where the front strand ends and how much of your neckline shows.

Where does the wave turn?

If the bend of a wave sits right on the corner of your jaw, lift the strand so the bend falls at your cheekbone. Look from the side to see which placement you prefer.
