Which bridal hairstyle works for a long face?

A low bun with some fullness at the temples or cheeks draws the eye outwards. A soft wave on one side can do the same. If you enjoy height, try a small lift at the crown and check the full look with your veil.

Try the veil above and below the bun

Hold the veil first above the bun and then just below it. A side view shows how much the veil rises above your crown and helps you choose the height you like.
