How do I plan bridal styling at home in the Netherlands?

First decide when you need to be ready for the photographer, ceremony or journey from home. Then discuss hair or hijab, makeup and your veil. Mention any relatives who will also need styling at the same address.

Leave your helper a free slot

If someone is buttoning your dress or helping with your veil, keep them free at that point, especially if they are having hair or makeup done too. Add their name next to your dressing time on the schedule.
