How do I choose bridal hair to suit the venue?

For an outdoor venue, think about wind and how long you will be outside for photographs. A low bun or pinned-back front sections can help. At an indoor celebration you may prefer something looser. If you change venues, consider how your veil will sit in the car.

Think about your chair at dinner

If your reception chair has a high back, try sitting against a similar chair with your bun or hairpin in place. Moving a bun a little higher or to one side may make it more comfortable to lean back.
