How can a friend help me choose my bridal hairstyle?

Ask someone who knows your taste to take pictures from the front, side and back. They can also watch how the veil moves as you walk. That gives you another pair of eyes for the details you cannot easily see yourself.

Give your helper one thing to look for

Ask whether your earring stays visible when you turn to face someone. It gives your helper a specific detail to check, even if the two of you usually prefer different styles.
