Do I need long hair for a bridal hairstyle?

Short hair offers plenty of options, including soft waves, a defined side part or a carefully placed pin. With medium or long hair you can also try a low bun or braid. A photo of your current length helps when choosing.

Check the shortest layers at the nape

Tie your hair at the height you want the bun and see which short sections escape underneath. Take a photo so you can discuss leaving these pieces out, pinning them separately or placing the bun lower.
