# What types of bridal accessories can I wear in my hair?

Individual pearl pins or small flowers can be dotted through the hair. For one focal point, try a comb, headband or side clip. Check that there is enough room for the veil if it will fasten in the same area.

## A headband with or without ribbon tails

Look at how the headband ends. Long ties can become part of a braid, while short, smooth ends are easier to hide beneath a bun. Check the finished back with your veil in place.
