How do I request a particular hijab style at home?

A photo helps, but also say what you like about it, such as a fold at the temple, a smooth front or the way the fabric falls over the shoulder. Mention your outfit colour and how much coverage feels comfortable.

Specify the shoulder in a mirrored selfie

If you send a mirrored selfie, say whether the long end should fall over your own left or right shoulder. This matters especially when embroidery or a brooch on one shoulder needs to stay visible.
