What does a stylist do at a home appointment?

At a home appointment, Sinem provides the services you agreed on, such as hair, a styled hijab, makeup or a combination. Start by looking at the outfit and any accessories together so the different elements work as a whole.

Speak up if a pin or fold presses

Before the last pin goes in, turn your head and lean back briefly. If something presses, point to the precise spot while you are still in the chair so you can check the adjustment together.
