How does an at-home hijab styling session work?

First discuss the fabric, the volume you like and the coverage you want. Then come the base under the scarf, the folds and any finishing veil or pin. Check the side view in the mirror and make sure you can move comfortably.

Check the neckline while moving

With a high collar or button-front blouse, look down and then over each shoulder once the scarf is in place. If an edge lifts, show how much neck coverage you want to keep as you move.
